### Reasons for Allowance

The following is an examiner's statement of reasons for allowance:

Following an extensive telephone conversation with Douglas Holtz, Attorney for Applicant, Examiner was able to identify allowable subject matter requiring specific amendments to the claim language. Attorney Holtz, working with Examiner, modified the claim language accordingly, which modification after additional searching was not overcome by the prior art, and as such, was found to be patentable subject matter.

Specifically, Examiner notes that the specifically enumerated order of Applicant's claim limitations is not overcome by the prior art in that it would not be obvious without improper hindsight and further, there would be no motivation for the same. Examiner notes that Schettler "filtering functionality" does not specifically enumerate an order in the manner claimed by Applicant as follows:

1. Management objects are first classified, (by time, access frequency or value change frequency);
2. A first management object is collected and stored;
3. In response to a request for a second management object:
  - a. completion of collection of first management objects;
  - b. collection of second management objects;
  - c. transmission of second management objects;
4. In response to a request for a first management object:
  - a. retrieve from memory first management object;

Art Unit: 2143

- b. collection of second management objects;
- c. transmission of first management objects concurrent with continued collection of second management objects.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
